WATER TESTING FOR PREVENTIVE HEALTH CARE

"The human right to water is indispensable for leading a life in human dignity. It is a prerequisite for the realization of other human rights".

- *The Committee on Economic, Social and Cultural Rights, November 2002 Article on the right to water.*

IS YOUR WATER SAFE FOR DRINKING?

Have you ever wondered, what's there in your drinking water?

It is often contaminated with organic and inorganic impurities like high levels of arsenic, fluoride, heavy metals and micro organisms or pathogens, etc.

75% of infectious diseases are caused by Water Borne Contaminants, hence drinking water testing is important. Without good water supplies people can succumb to all types of illnesses.

Common misconception: Filtered or boiled water is misconceived to be safe for drinking and cooking purposes.

The Truth: Lack of awareness about safe drinking water is the main reason which directly leads to cause and spread of several diseases.

Solution: Water tested from certified and accredited labs will ensure 100% safe drinking water.

SO WHO NEEDS WATER TESTING?

• Offices

It is a necessity if you own a corporate office, to ensure safe drinking water for employees and add value to their business.

• Food Business Operators

It is beneficial for fast food chains, restaurants etc. to ensure safe drinking water add value to their business by developing client trust.

• Recreational Businesses

It is vital for resorts, water parks, swimming pools, etc. to ensure that the water fit for recreational purposes for client of all age groups

• Households

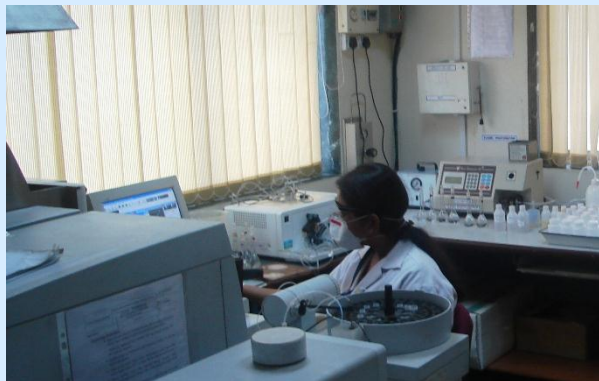

Water purifier approved by an accredited lab is an essential need for every household.

• Others

Hospitals, Airports, Railways, Educational Institutions, Etc.

Did you know?

Human beings need 3 - 4 litres of water daily through drinking or eating.
